

Average of Current Loan Amount and Max of Current Loan ...

Average of Monthly Debt and Max of Monthly Debt by Loan...

# Data Exploration Report

09/01/2022

Conclusion: of all variables, Average Monthly Debt and, potentially, Current Balance and Current Loan Amount are connected with the Charged Off loan status the strongest

Average of Current Credit Balance and Max of Current...

Average of Credit Score and Max of Credit Score by Loan Status

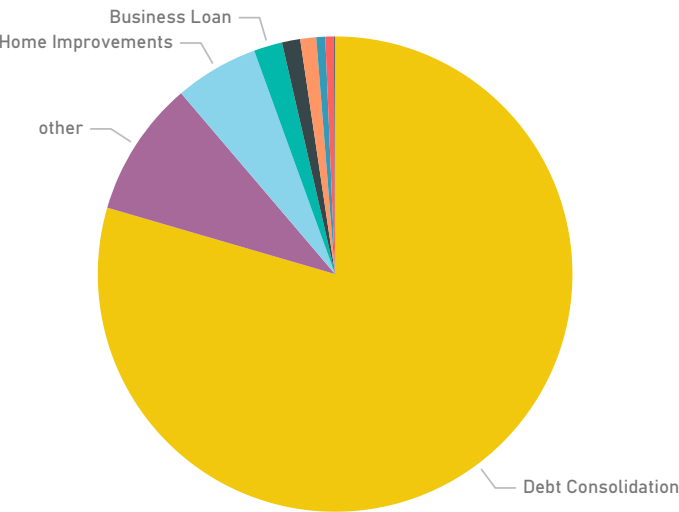

Average of Current Loan Amount by Loan Status and Term

Average of Current Loan Amount by Loan Status and Home Ownership

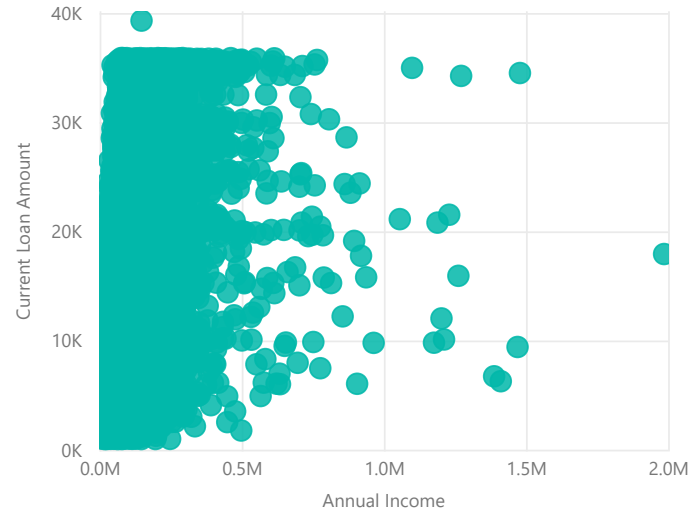

Count of Purpose by Purpose

Average of Current Loan Amount by Loan Status and Purpose

Annual Income and Current Loan Amount

Years of Credit History and Credit Score

Current Credit Balance and Credit Score

Annual Income and Credit Score

Maximum Open Credit and Credit Score

Maximum Open Credit and Years of Credit History

Credit score is correlated with a number of other variables, such as Ears of Credit History and Current Credit Balance. This creates collinearity between independent variables and is likely to affect the Logistic Regression classification. The Annual Income variable does not predict Credit Score or Current Loan Amount.
